

New Claim

Please add the following new claim 36:

36. (NEW) A system for automatic prioritizing of text, comprising:
- a text classifier trained to receive text and to determine a priority for each received text;
 - at least one storage media configured to store received text in order of priority; and
 - an implicit training module configured to continually watch text selected by a user while working, the selected text having an assigned priority and comprising new training messages to the text classifier, such that the text classifier is updated by training in the background using the new training messages for enhancing priority decision making.
